KATOA

Keep All That's Owed Always

Zero-fee creator support on Bitcoin Lightning. Borderless.
Private. Open source. You keep 100%.

PLATFORM FEE

0%

MONTHLY COST

\$0

YOU KEEP

100%

COUNTRIES

195+

Share a link. Get paid. **Keep it.**

What it is

A page (profile + wishlists) you share. People send Bitcoin over Lightning to **your** wallet. Same idea as a tip jar or a subscribe button — Katoa’s cut is 0%, forever. No bank. No KYC. No week-long PayPal hold.

Why it feels real

Lightning is coffee-money speed in 195+ countries. Wishlists turn “I need rent / gear / a skate ramp” into a list with progress. Profiles look like a modern feed — without the platform owning you. Open source, so 0% is auditable.

Who it’s for

Students, waitstaff, musicians, skaters, tutors — anyone with fans or regulars. Sign up with email or Google. Add your Lightning address. Supporters scan a QR and tap. Katoa never holds the money.

Why you’d use it

The old internet taxes the work. ~20% here, \$40/mo there, frozen banks everywhere. Investor: a creator economy not rented from Visa. 25-year-old: share a link, get paid, keep it.

Honest today: gifts use the creator’s saved Lightning address. Production invoices are still being wired. Subscribe / likes are labeled demo until settlement is live. Sample catalog is 11 creators — never “thousands.”

Platforms take 5–20% — and your freedom

Creators do the work. Gatekeepers own the relationship, delay payouts, and skim forever.

20%

Large subscription apps

~\$24k/year lost on \$10k/mo earnings. Bank + KYC required.
Deplatforming risk.

10%

Wishlist / gifting apps

Limited countries for low fees. Currency conversion adds up.

9–10%

Link-in-bio

Or pay \$480/year for 0% fees. Either way — rent.

"How much of your support actually reached them?"

Infrastructure, not rent extraction

- ✓ **0% platform fees — forever.** Architectural invariant. No take-rate tables.
- ✓ **Bitcoin Lightning to wallets you control.** Non-custodial. Katoa never holds funds.
- ✓ **195+ countries.** No bank account. No KYC to start receiving.
- ✓ **Nostr optional.** Your keys. Your audience. Email + Google work today.
- ✓ **MIT open source.** Auditable. Forkable. FOSS forever.

Lightning network fees are tiny and not Katoa's cut. We market addresses + QR now; we do not claim production invoices until the webhook is live.

Let the math close the deal

PLATFORM	FEES	COUNTRIES	PAYOUT	BANK / KYC
Large subscription apps	~20%	Limited	Days	Required
Wishlist / gifting apps	~10%	~10 for 0%	Slow	Required
Link-in-bio	9–10% or \$40/mo	~50	Varies	Required
KATO A	0%	195+	Lightning	Not required

Live fee calculator on katoa.org — supporters see exactly where sats go. \$10k/mo creator: ~\$24k/year not lost to a 20% take.

Everything included. **Zero** extra cost.

BOLT 12 path

Wishlist engine

URL parsing, progress tracking, QR codes, themes, geo tags, public or private lists.

Bitcoin surface

Creator-controlled addresses, QR, BTC price strip, MapLibre + OpenFreeMap. No fake "live network widgets."

What’s live today

Auth

Email + Google register. Signup agrees to Terms & Privacy. Nostr is check/link — not a fake session.

Wallets

Add and edit Lightning + on-chain. Dummy bitcoin.org addresses rejected. Gift QR follows the saved wallet.

Public profile

[/u/:username](#) — Tip, Follow, Message. Owner can edit addresses on the page.

Night-jewel

Deep plum glass, violet energy, bitcoin-orange money. Mobile chrome clears copy. SPA 404.

Still THOR: Lightning invoice webhook, platform nsec, NIP-05 merge, NIP-07 challenge login, live metrics. Subscribe / PPV / likes stay local seams until then.

Built for people who refuse rent

Primary

- ✓ Independent creators & educators
- ✓ Students, waitstaff, tutors, musicians
- ✓ Mutual aid & community projects
- ✓ Unbanked / censored builders worldwide
- ✓ Bitcoin & Nostr natives

Supporters & givers

- ✓ Private, low-fee giving without surveillance
- ✓ QR + share links — no app lock-in
- ✓ Confidence that sats reach the cause
- ✓ Future: agent-driven campaigns on Nostr

UNDER THE HOOD

Real product. Real stack.

Frontend

React 18 · TypeScript · Vite · Tailwind v3 · React Router v6 · night-jewel glass UI · 7 languages

Backend

Supabase Postgres · Auth · Storage · Row Level Security on every table

Bitcoin layer

Lightning + on-chain addresses · Nostr (NIP-07 check) · QR · MapLibre · BTCPay webhook code · BOLT12 path

Live at katoa.org on Cloudflare Pages · MIT license · github.com/kitsboy/katoa

Private money. Feel-good giving.

KATOA is the wishlist & creator-support arm of Give A Bit — Bitcoin education, services, and hope for normal people.

Mission alignment

Financial sovereignty · privacy by design · open source · Safe Harbour education

Cross-promotion

giveabit.io footer · shared i18n · Hermes/Kimi ops · Obsidian handoffs

We will never charge platform fees. Creators keep what they're owed — always.
